Relevant Experience

Public Platform
Junior Web Developer

May 2023 - Current
Grand Rapids, MI

- Currently leading the development of a web-based platform for ranking Christian colleges and universities.
- Successfully managed the migration of a WordPress website to a modern theme, sustaining a user base of 40,000 monthly visitors while achieving a 20% reduction in development time and costs.
- Effectively addressed an array of migration challenges, including plugin incompatibility, restoration of lost images and misaligned data stemming from database migration.
- Employed maintainable themes to establish 4 websites, expediting development and deployment timelines by 25%.
- Streamlined project initiation and completion by contributing to company-wide documentation for standardizing website creation.

Theo Agency
Software Development Intern

Spring 2023
Portland, OR

- Contributed significantly to the front-end development of a customer data platform (CDP), enabling clients to access and analyze personalized company data, resulting in a 30% reduction in data subscription expenses.
- Leveraged Google Analytics 4 and Google Tag Manager to track and analyze user interactions on client websites to gain insight on user traffic.
- Effectively implement static web pages using various content management systems.
- Implemented comprehensive test suites (unit, integration, and end-to-end) using modern frameworks/methods to guarantee software reliability and quality.

United States Army
Team Leader

Oct. 2018 – Mar. 2022
Fort Drum, NY

- Mentored a team of 3 healthcare specialists, achieving a 25% improvement in work efficiency and performance by establishing monthly objectives to optimize proficiency.

Personal Projects

Milestones | *Repo* | *Next.js 13, NextAuth, TypeScript, MySQL, Prisma* In Progress

- Initiated a project to store and track all your milestones. The application aims to combat imposter syndrome and self doubt by reminding users of their accomplishments.

Full-stack Ecommerce Site | *Repo* | *React, MongoDB, Node.js, Express* Mar 2023

- Created a full-stack e-commerce website for dog clothes using MongoDB, Express, NodeJS, and React, with user authentication via JWT tokens and PayPal integration for payment processing.

Education

Epicodus
Certificate of Completion - C# and React

Oct. 2022 – Apr. 2023
Portland, OR

University at Buffalo, SUNY
Bachelor of Arts in Communication

Aug. 2014 – Feb. 2018
Buffalo, NY
